Measurement Sheet

INSTRUCTIONS

Step 1 - Wearing your boot socks, stand on this sheet of paper. Distribute your weight evenly on both feet. Holding a pencil straight up and down, outline each foot.

Step 2 - Take measurements of your foot at the heel, instep, and ball with a measuring tape as shown on the diagram below. Gently pull tape snug. For an accurate measure, we recommend sitting down and crossing the leg of the foot to be measured over your other knee.

Step 3 - Measure around your leg at 6", 8", 10", 12", 14", and 16" intervals from the heel to the desired boot height. Example: If you want a 10" boot, send us your 6", 8", and 10" measurements.

Note: If your foot tracings and measurements indicate that you need a special pattern, we will notify you before starting your order.

If you ordered boots from us in the past, we may have your measurements on file. Please check the box below and provide us with the approximate year of your last order.
