

"DEDICATED GEAR FOR DEDICATED PEOPLE"

# EDC POCKET KIT

## INSTRUCTIONS:

- 1) Cut out paper stitching template on dashed line
- 2) Place the template on the desired location of boot or product
- 3) Tape template in place so it does not move
- 4) Place a soft backer behind template to stop the awl from piercing unwanted areas. (ie, packaging box filled with paper, wood, thick leather, plastic, stacked cardboard, etc)
- 5) Using the awl provided carefully punch each stitch hole as marked
- 6) Using the needles and thread provided saddle stitch the pocket onto the boot/product, starting on one end and working your way around causing the pocket to pucker as you stitch. At the end of your stitch don't forget to back stitch a few stitches and burn and flatten the ends on the inside of the product
